WORK EXPERIENCE

2018-07-31 TO PRESENT

Front-end developer:

Self-managed and egalitarian company (Scop), I have various missions directly at the customer. Exclusively in Javascript, I mainly work on the Front but I also have some Back missions (NodeJS). I've been in charge of small teams as a coach and technical referent.

- React and Typescript expertise, systems design
- GraphQL (Apollo) and Express (NodeJS)

2016-10-31 TO 2017-03-31

Fullstack developer:

Main mission is to improve the intranet of the social security of Calais.

- Refactoring and bug fixes of the existing codebase (PHP)
- Optimization of server performance

2013-11-31 TO 2014-02-31

Prestashop developer:

Short mission to enable the company to have its online store.

- Design in Photoshop, taking pictures for the product sheets
- Integration with Prestashop

2012-01-31 TO 2013-07-31

Webdesigner:

Startup where flexibility was needed. I was mainly doing the design of the sites, but I often took care of their integration or development with Prestashop.

- Webdesign in Adobe Photoshop and Illustrator
- Integration with Prestashop

2011-05-31 TO 2011-11-31

Database Assistant:

Give assistance in the design of a database listing all addresses in Calais.

- Database design with Merise method
- User interface realized with Access in VBA
- Learning Geographic Information Systems (GIS)

2008-07-01 TO 2010-03-31

Front-end junior developer:

Work-study contract, then permanent contract. Worked with many different clients (Auchan, Orchestra, Tape à l'oeil, la Redoute, 3 Suisses, Leroux, etc)

- Integration of dozens of websites (HTML / CSS / Javascript)
- Flash animation development with Actionscript (AS3)
- jQuery module development
